## CUTTINGS AND YOUNG PLANTS

Savanna flowers is a reliable supplier for cuttings and young plants . We have a wide range of species that we grow at our farm in Africa located close to the equator at Lake Naivasha at an altitude of 1,900m. This Catalogue shows various **succulents** that we grow.

# SAVANNA

Flowers

The company goal is to supply high quality, hygiene and disease free cuttings and rooted young plants to customers all over the world. An experienced and well trained team of mainly local managers and employees will be happy to supply and serve you.

Unrooted cuttings, rooted cuttings and boxes

Savanna Flowers produces rooted and unrooted cuttings and young plants. These are the basic requirements for our clients and we thus strive to remain simple but able to satisfy your basic needs.

## UNROOTED SEDUM AND SUCCULENT CUTTINGS

The unrooted cuttings are harvested in units of 200-300 pieces/unit and depending on the variety packed 1200 - 1800 cuttings per box. The box size is 55 x 37 x 43 cm

Image showcases rooted succulents plugs

**Aeonium**

**Arboreum Nigrum**

- Dark purple, almost black rosettes
- Grow on the top of tall elegant stems

**Crassula**

**Minor**

- Evergreen succulent with shiny leaves
- Blooms during winter

**Crassula**

**Ovata Gollum**

- Interesting tubular leaves that have a reddish tint
- White star-like flowers, that often appear in late fall and early winter

**Crassula**

**Ovata Sunset**

- glossy, rounded, fleshy green leaves adorned with golden yellow tips and red edges
- small starry white or pink flowers bloom in profusion from fall to spring

**Crassula**

**Schmidtii**

- thick leaves are often covered with hair
- flowers are generally small and borne on terminal panicles

**Crassula**

**Sally sawtooth**

- Extremely tightly packed, scale-like leaves
- Unbranched, upright stems if not pinched

**Crassula**

**Arborescens**

- blue-grey foliage

**Crassula**

**Ovata**

- Oblong, fleshy, shiny, evergreen leaves
- Leaves may acquire red tints when grown in direct sun

**Crassula**

**Ovata Horntree**

- tube like leaves that look like live horns
- Prefers bright light

Crassula

Cosima Cosima (Crass 21005)

Echeveria  
Amoena

- yellow-orange flowers
- take on a red colouring in strong light

Echeveria  
Metallica

- spoon-shaped, wavy-edged, metallic bronze-green leaves with pink margins
- Racemes of bell-shaped reddish flowers are yellow inside

Echeveria  
Nodulosa

- deep-green leaves and burgundy through to pink markings
- blooms in the summer

Echeveria  
Peacockii

- iridescent silver-blue leaves that can become tipped in red
- long-lasting flowers are pink-orange on slender stalks in early summer

Echeveria  
Pulvinata

- striking red, velvet coating
- These leaves are thick and spatulate

Echeveria  
Devotion

- warm burgundy color with green leaves feel velvety and super soft
- branched thin stems that are round and rod-shaped

Echeveria  
X set oliver

- base colour is a deep green
- entire rosette is covered in hairs that will show off a silver glow under strong light

Echeveria  
Hookeri

- silvery blue-green, pointed leaves
- leaf tips turn red with enough sun
- bell-shaped pink flowers atop stalks

Echeveria  
Lipstick

- green rosette with pointed leaves lined with crimson

Echeveria  
Elegans

- tight rosettes of pale green-blue fleshy leaves
- long slender pink stalks of pink flowers with yellow tips in winter and spring

Echeveria  
Rubra

- sharp-tipped leaves edged in red
- produces striking colours when subdued to long hours of sun

Echeveria  
Purpusorum

- Develops pointy leaves, and the whole plant grows into something resembling a fully bloomed rose flower pattern

Echeveria  
Agavoides

- forming rosettes of triangular, fleshy, evergreen leaves in pale green with red margins
- In spring and early summer, red, lantern-shaped flowers with yellow tips appear on tall stems

Echeveria  
Lilacina

- The leaves are silvery-grey, spoon shaped, fleshy and arranged in a symmetrical rosette
- Flowers are pale pink or coral-colored

Kalanchoe  
Tomentosa

- Fleshy, oval-shaped leaves are densely covered in whitish hairs

Kalanchoe  
Thyrsiflora

- features a basal rosette of large, fleshy, wedge-shaped or paddle-shaped, stalkless, obovate, gray-green leaves
